Change admin email address on WordPress

By default to change the WordPress admin email address you need access to the old admin email address, this can be a problem if you did not build the site.

Administration Email Address

This address is used for admin purposes. If you change this, an email will be sent to your new address to confirm it. The new address will not become active until confirmed.

There is a way round this, by navigating to [Settings][General]

Then changing the address in the address bar from /options-general.php

anda.org/wp-admin/options-general.php

To /options.php then pressing [Enter]

anda.org/wp-admin/options.php

This new screen will give you access to all the WordPress settings

Scroll down to admin_email and enter your new admin email address

Then scroll down to new_admin_email and enter your new admin email address again

Scroll to the bottom and press [Save Changes]

WPLANG

en_GB

Save Changes
