Change admin email address on WordPress

By default to change the WordPress admin email address you need access to the old admin email address, this can be a problem if you did not build the site.

There is a way round this, by navigating to [Settings][General]

Then changing the address in the address bar from /options-general.php

anda.org/wp-admin/options-general.php

To /options.php then pressing [Enter]

anda.org/wp-admin/options.php

This new screen will give you access to all the WordPress settings

All Settings

Warning: This page allows direct access to your site settings. You can break things here. Please be cautious!
