Fixing digital devices

I think there should be a hardware section as well, this could include things like on how to fix little things on a pc, phone, laptop and etc.

it could be changing ram, changing little phone things like the sim card.

then it could include things like what wires do what for monitors, (pc section), then for phone, it could talk about chargers and what sim cards fit what phones and etc. (phone section)

Made with the help and support of [Inclusive Bytes CIC](#)
