How do I archive a web page?

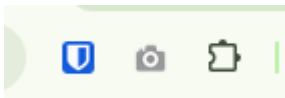

Visit <https://chromewebstore.google.com/detail/gofullpage-full-page-scre/> using the Chrome web browser.

A screenshot of the Chrome Web Store page for the 'GoFullPage - Full Page Screen Capture' extension. The page features a search bar at the top, navigation links, and a main section with the extension's name, a rating of 4.9 stars (74.7K ratings), and a user count of 8,000,000. Below this are two large images: the first shows a browser window with a 'Screen capture in progress...' popup, and the second shows the resulting full-page screenshot. At the bottom, there are three small thumbnail images of the extension's interface.

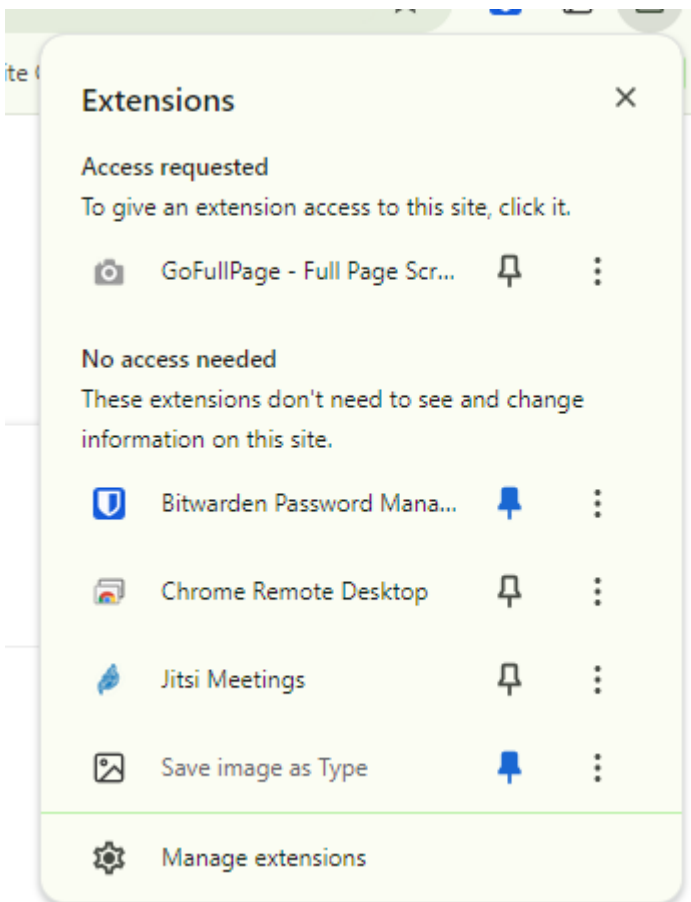

Click [Add to Chrome] and when the popup appears click [Add extension]

This will give you an extra icon to the right of the address bar

If you cannot see it camera icon click the jigsaw icon and then click the pin icon next to "Go FullPage" so that it is coloured in.

You can now get a full screenshot of any website page by clicking the camera icon and then saving it to your computer either as a pdf or jpg.
