How do I Export data with WP All Export?

The first time you want to export data from WordPress navigate to [All Export] then [New Export]

Select the kind of data you want to export

First, choose what to export.

Optionally add any filtering options you want.

Then click Customize [Export File]

Click [Add All] to add all available fields to your export file.
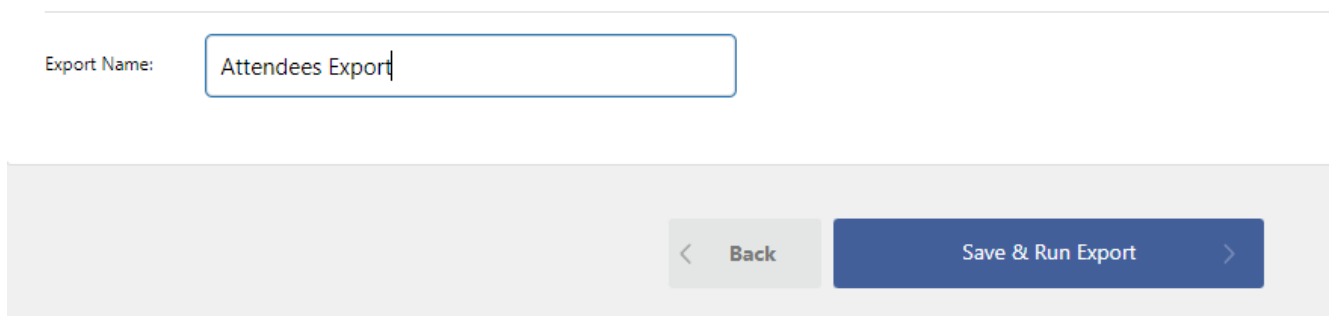

Then click [Continue]

Give the export a friendly name and click [Save & Run Export]

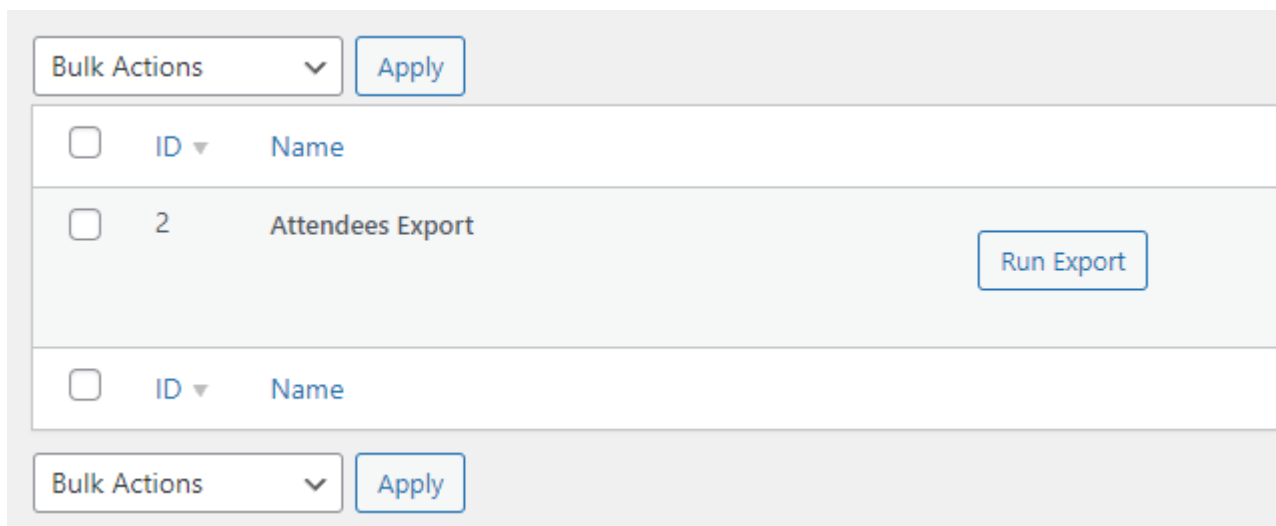

In a few seconds you will be able to download your file by clicking the [CSV] button.

Then find your export in the list and click [Run Export]
