How to block ads and pop-ups on web browsers on PC

Visit the extension page on your web browser and type uBlock in the search bar.

Click on the first one that pops up. It will wither be called uBlock Origin or uBlock Origin Lite. Then click **add to (browser of choice)**.

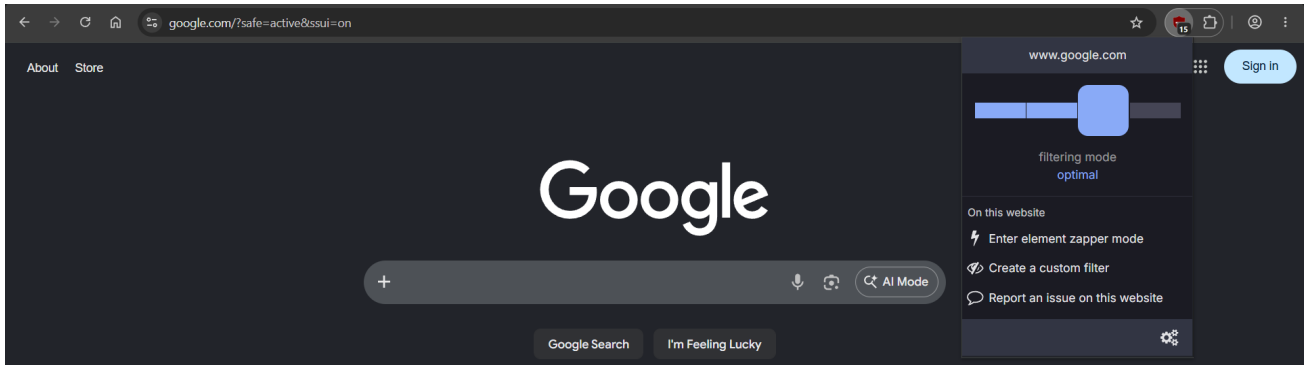

Next, click the extension button that can be found at the far right of the main search bar which will then bring up a pop-up where you can pin uBlock for easy access.

Click the pin and u should see the red uBlock icon pop up on the far right of your search bar.

Then, you can change how much filtering the extension should do.
