# How to transfer data from Android to IOS.

How to transfer data from android to IOS

**Step 1** – Make sure both devices have power then plug both phones into power and ensure the new iPhone is on the hello setup screen.

**Step 2** – Download the move to IOS app from the play store and open it.

**Step 3** – Then on the iPhone, follow the setup until the apps and data is on the screen, then select move data from android.

**Step 4** – Then a code will appear on the iPhone which needs to be entered on the android device.

**Step 5** – Choose the data that you want to transfer and wait for the bar to load on the iPhone.

**Step 6** – When finished tap done on the android and the transfer will be completed.
